Math Practice Test K

1 A jacket costs $60. Its price goes up by 10%, and then the new price is reduced by 25%. What is the final price?

Working

Answer

2 x is 2, 5 and 8. y is 6, 15 and 24. Is y proportional to x? Write yes or no.

Working

Answer

3 A car travels 150 miles in 3 hours. At the same speed, how far does it travel in 5 hours?

Working

Answer

4 A fish tank is 40 cm long, 25 cm wide and 30 cm tall. What is its volume?

Working

Answer

5 Work out 608 × 347

Working

Answer

6 Work out 7.56 ÷ 0.36

Working

Answer

7 A club costs $20 to join and then $15 a month. Sam has paid $110 in all. For how many months has he been a member?

Working

Answer

8 Work out 9.05 – 3.68

Working

Answer

9 Work out –4 1/2 + 2 3/4

Working

Answer

10 Work out (–3) × (–2/3) × 5

Working

Answer

Answer Key: Math Practice Test K

Answers involving money or ages should include units ($, ¢, years). Working shows one way to solve each.

Q	Answer	Working	Skill checked
1	**$49.50**	Up 10%: $60 + $6 = $66. Then 25% of $66 is $16.50: $66 – $16.50 = $49.50	Solve multi-step percent problems (7.RP.A.3)
2	**yes**	y ÷ x is 3 every time, so yes	Recognize a proportional relationship (7.RP.A.2)
3	**250 miles**	150 ÷ 3 = 50 miles each hour; 50 × 5 = 250 miles	Ratio reasoning in a real-world problem (6.RP.A.3)
4	**30000 cm³**	40 × 25 = 1000, × 30 = 30000 cubic centimeters	Find volume by multiplying edge lengths (5.MD.C.5)
5	**210976**	608 × 300, 608 × 40, 608 × 7, then add column by column	Multiply 3-digit by 3-digit whole numbers (5.NBT.B.5)
6	**21**	Multiply both by 100: 756 ÷ 36 = 21	Divide multi-digit decimals (6.NS.B.3)
7	**6**	20 + 15m = 110, so 15m = 90 and m = 6	Write and solve an equation from a word problem (7.EE.B.4)
8	**5.37**	9.05 – 3.68: borrow in the hundredths and again in the tenths	Subtract decimals to hundredths (5.NBT.B.7)
9	**–1 3/4**	The negative part is bigger, so the answer is negative: 4 2/4 – 2 3/4 = 1 3/4	Add rational numbers using properties of operations (7.NS.A.1.d)
10	**10**	Two negatives make a positive. 3 × 2/3 = 2, then 2 × 5 = 10	Multiply rational numbers using properties of operations (7.NS.A.2.c)
