Math Practice Test M

1 Which unit measures the space inside a box: cm, cm² or cm³?

Working

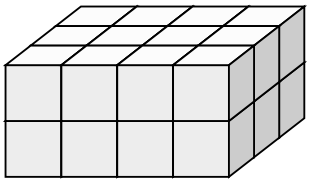
Answer

2 Pattern A starts at 0 and adds 3. Pattern B starts at 0 and adds 6. The first pair is (0, 0). Write the 4th pair (A, B).

Working

Answer

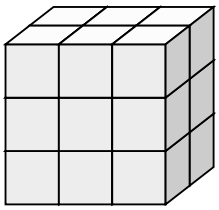
3 This box is full of unit cubes. How many cubes?



Working

Answer

4 This box is full of unit cubes. How many cubes?



Working

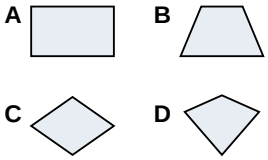
Answer

5 Every rectangle has four right angles. Which of these must have four right angles? A square, B rhombus, C rectangle, D parallelogram. Write the letters.

Working

Answer

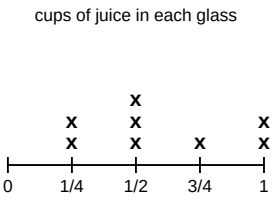
6 Which of these shapes are parallelograms? Write the letters.



Working

Answer

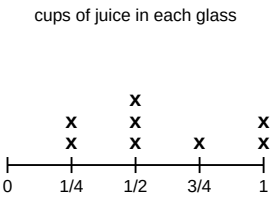
7 The line plot shows the juice in each glass. How much juice is there in all?



Working

Answer

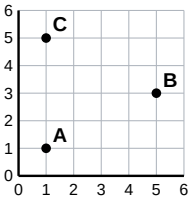
8 How much more juice is in the fullest glass than in the emptiest?



Working

Answer

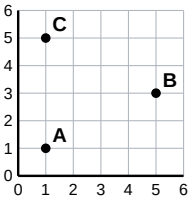
9 On this map, x is blocks east and y is blocks north. Write the coordinates of B.



Working

Answer

10 How many blocks north of point A is point C?



Working

Answer

Answer Key: Math Practice Test M

Answers involving money or ages should include units ($, ¢, years). Working shows one way to solve each.

Q	Answer	Working	Skill checked
1	**cm³**	Space inside is volume, and volume is measured in cubic units	Volume is measured in cubic units (5.MD.C.3)
2	**(9, 18)**	A: 0, 3, 6, 9. B: 0, 6, 12, 18. 4th terms: (9, 18)	Ordered pairs from two number patterns (5.OA.B.3)
3	**24**	4 × 3 in each layer = 12, × 2 layers = 24	Volume by counting unit cubes (5.MD.C.4)
4	**18**	3 × 2 in each layer = 6, × 3 layers = 18	Volume by counting unit cubes (5.MD.C.4)
5	**A, C**	A square is a special rectangle, so it has four right angles too	Attributes of a category apply to its subcategories (5.G.B.3)
6	**A, C**	A parallelogram has both pairs of opposite sides parallel: the rectangle and the rhombus do; the trapezoid has one pair, the kite none	Classify quadrilaterals by their properties (5.G.B.4)
7	**4 3/4 cups**	2 × 1/4 + 3 × 1/2 + 1 × 3/4 + 2 × 1 = 1/2 + 1 1/2 + 3/4 + 2 = 4 3/4 cups	Use fraction operations on a line plot (5.MD.B.2)
8	**3/4 cup**	1 – 1/4 = 3/4 cup	Use fraction operations on a line plot (5.MD.B.2)
9	**(5, 3)**	5 east, then 3 north	Interpret coordinates of points in context (5.G.A.2)
10	**4**	Same x; y goes from 1 to 5: 4 blocks	Interpret coordinates of points in context (5.G.A.2)
