Math Practice Test O

1 A lamp costs $50. Its price goes down by 20%, and then the new price goes up by 10%. What is the final price?

Working

Answer

2 A gym costs $24 to join and then $12 for each class. Ana has paid $108 in all. How many classes has she taken?

Working

Answer

3 A point is at (3, 8). How far is it from the y-axis?

Working

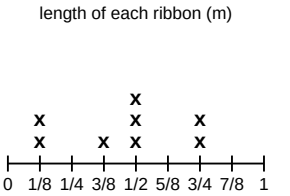
Answer

4 Work out (–5/6) × (–3) × (–2)

Working

Answer

5 The ribbons are joined end to end. What is the total length?



Working

Answer

6 A triangular sail has a base of 7 ft and a height of 10 ft. What is its area?

Working

Answer

7 Work out $2^3 + 3^2$

Working

Answer

8 Which is a statistical question? A: How tall is Sam? B: How tall are the students in Sam's class? C: How many days are in May? Write the letter.

Working

Answer

9 4 notebooks cost $10. How much does one notebook cost?

Working

Answer

10 A 7 m rope is cut into 4 equal pieces. How long is each piece?

Working

Answer

Answer Key: Math Practice Test O

Answers involving money or ages should include units ($, ¢, years). Working shows one way to solve each.

Q	Answer	Working	Skill checked
1	**$44.00**	Down 20%: $50 – $10 = $40. Then 10% of $40 is $4: $40 + $4 = $44.00	Solve multi-step percent problems (7.RP.A.3)
2	**7**	24 + 12c = 108, so 12c = 84 and c = 7	Write and solve an equation from a word problem (7.EE.B.4)
3	**3**	The first number is the distance across from the y-axis	Interpret the x-coordinate as horizontal distance (5.G.A.1)
4	**–5**	Three negatives: two make a positive, the third makes it negative. 5/6 × 3 = 5/2, × 2 = 5, so –5	Multiply rational numbers using properties of operations (7.NS.A.2.c)
5	**3 5/8 m**	2 × 1/8 + 3/8 + 3 × 1/2 + 2 × 3/4 = 2/8 + 3/8 + 1 1/2 + 1 1/2 = 3 5/8 m	Use fraction operations on a line plot (5.MD.B.2)
6	**35 ft²**	7 × 10 = 70, halved = 35 square feet	Area of a triangle in a real-world problem (6.G.A.1)
7	**17**	$2^3 = 2 \times 2 \times 2 = 8$; $3^2 = 3 \times 3 = 9$; 8 + 9 = 17	Evaluate an expression with whole-number exponents (6.EE.A.1)
8	**B**	Only B expects different answers from different students	Identify a statistical question (6.SP.A.1)
9	**$2.50**	$10 ÷ 4 = $2.50	Find a unit rate from a real-world ratio (6.RP.A.2)
10	**1 3/4 m**	7 ÷ 4 = 7/4 = 1 3/4 m	A fraction as division in a sharing problem (5.NF.B.3)
