Math Practice Test A

Decimals, percentages and word problems · No calculator

Show your working. Write your final answer, with units, in the answer box.

1 Work out 10.4 – 6.785

Working

Answer

2 Work out 3.6 × 7

Working

Answer

3 Work out 0.25 × 1.6

Working

Answer

4 Work out 17.25 + 8.9 + 0.65

Working

Answer

5 Work out 9.36 ÷ 4

Working

Answer

6 30% of a number is 18. What is the number?

Working

Answer

7 A game costs $45. Its price is reduced by 20%, and then the new price is reduced by a further 10%. What is the final price?

Working

Answer

8 Mia buys 4 pens at $1.35 each and a ruler for 85¢. How much change does she get from $10?

Working

Answer

9 Mom is 5 times as old as Leo. In 3 years' time, Mom will be 4 times as old as Leo. How old is Leo now?

Working

Answer

10 A ruler and a pencil cost $1.20 together. The ruler costs 40¢ more than the pencil. How much does the pencil cost?

Working

Answer

Answer Key: Math Practice Test A

Answers involving money or ages should include units ($, ¢, years). Working shows one way to solve each.

Q	Answer	Working	Skill checked
1	**3.615**	10.400 – 6.785 (fill the gaps with zeros)	Subtract multi-digit decimals (6.NS.B.3)
2	**25.2**	36 × 7 = 252, one decimal place, so 25.2	Multiply multi-digit decimals (6.NS.B.3)
3	**0.4**	25 × 16 = 400, three decimal places, so 0.400 = 0.4	Multiply multi-digit decimals (6.NS.B.3)
4	**26.8**	Line up the decimal points: 17.25 + 8.90 + 0.65	Add multi-digit decimals (6.NS.B.3)
5	**2.34**	Long division: 9.36 ÷ 4, keep the point in line	Divide a decimal by a whole number (6.NS.B.3)
6	**60**	10% = 18 ÷ 3 = 6, so 100% = 60	Find the whole given a part and the percent (6.RP.A.3.c)
7	**$32.40**	$45 – 20% = $36; $36 – 10% = $32.40 (not 30% off $45, which gives $31.50)	Solve multi-step percent problems (7.RP.A.3)
8	**$3.75**	4 × $1.35 = $5.40; + $0.85 = $6.25; $10 – $6.25 = $3.75	Multi-step money problem with decimals (7.NS.A.3)
9	**9 years**	Leo = L, Mom = 5L. 5L + 3 = 4(L + 3), so 5L + 3 = 4L + 12, so L = 9 (Mom is 45)	Write and solve an equation from a word problem (7.EE.B.4)
10	**40¢**	Pencil = p, ruler = p + 40. 2p + 40 = 120, so p = 40¢	Write and solve an equation from a word problem (7.EE.B.4)
