Math Practice Test D

Decimals, percentages and word problems · No calculator

Show your working. Write your final answer, with units, in the answer box.

1 Work out 20 – (3 × 4) + 6

Working

Answer

2 Which is greater, 0.07 or 0.1?

Working

Answer

3 Work out 58 × 34

Working

Answer

4 Work out 4284 ÷ 42

Working

Answer

5 Work out 7.2 – 3.45

Working

Answer

6 Work out 5/6 – 1/4

Working

Answer

7 Work out 3/8 × 2/3

Working

Answer

8 How many halves are there in 6? (Work out 6 ÷ 1/2)

Working

Answer

9 How many meters are there in 3.5 kilometers?

Working

Answer

10 Start at the origin. Move 3 to the right and 2 up. Write the coordinates of the point you land on.

Working

Answer

Answer Key: Math Practice Test D

Answers involving money or ages should include units ($, ¢, years). Working shows one way to solve each.

Q	Answer	Working	Skill checked
1	**14**	Parentheses first: 3 × 4 = 12, then 20 – 12 + 6	Evaluate expressions with parentheses (5.OA.A.1)
2	**0.1**	0.1 is 10 hundredths, 0.07 is 7 hundredths	Compare decimals to thousandths (5.NBT.A.3)
3	**1972**	58 × 30 = 1740, 58 × 4 = 232, add them	Multiply multi-digit whole numbers (5.NBT.B.5)
4	**102**	42 × 100 = 4200, 84 left, 42 × 2 = 84	Divide with two-digit divisors (5.NBT.B.6)
5	**3.75**	7.20 – 3.45 (add a zero first)	Subtract decimals to hundredths (5.NBT.B.7)
6	**7/12**	Twelfths: 10/12 – 3/12	Subtract fractions with unlike denominators (5.NF.A.1)
7	**1/4**	Multiply across: 6/24, then simplify	Multiply a fraction by a fraction (5.NF.B.4)
8	**12**	Each whole holds 2 halves, so 6 wholes hold 12	Divide with unit fractions (5.NF.B.7)
9	**3500 m**	1 km = 1000 m, so × 1000	Convert measurement units (5.MD.A.1)
10	**(3, 2)**	The first number is across, the second is up	Name a point on the coordinate plane (5.G.A.1)
