Math Practice Test E

1 Work out 3 × [2 + (8 – 5)]

Working

Answer

2 Work out 214 × 132

Working

Answer

3 Work out 0.6 × 0.45

Working

Answer

4 Work out 8.3 – 4.67

Working

Answer

5 Work out 1 1/2 + 2 1/3

Working

Answer

6 Work out 1/5 ÷ 3

Working

Answer

7 How many meters are there in 450 centimeters?

Working

Answer

8 A cuboid measures 6 cm by 3 cm by 2 cm. What is its volume?

Working

Answer

9 Start at the origin. Move 4 to the right and stay on the x-axis. Write the coordinates of the point.

Working

Answer

10 What are the coordinates of the origin?

Working

Answer

Answer Key: Math Practice Test E

Answers involving money or ages should include units ($, ¢, years). Working shows one way to solve each.

Q	Answer	Working	Skill checked
1	**15**	Innermost first: 8 – 5 = 3, then 2 + 3 = 5, then 3 × 5	Evaluate expressions with nested parentheses (5.OA.A.1)
2	**28248**	214 × 100, 214 × 30, 214 × 2, then add	Multiply 3-digit by 3-digit whole numbers (5.NBT.B.5)
3	**0.27**	6 × 45 = 270, three decimal places, so 0.270 = 0.27	Multiply decimals to hundredths (5.NBT.B.7)
4	**3.63**	8.30 – 4.67 (add a zero, then borrow)	Subtract decimals to hundredths (5.NBT.B.7)
5	**3 5/6**	Sixths: 1 3/6 + 2 2/6	Add mixed numbers with unlike denominators (5.NF.A.1)
6	**1/15**	One fifth shared between 3 is a fifteenth	Divide with unit fractions (5.NF.B.7)
7	**4.5 m**	100 cm = 1 m, so divide by 100	Convert from a smaller unit to a larger unit (5.MD.A.1)
8	**36 cm³**	Volume = 6 × 3 × 2, and three lengths multiplied give cubic units	Volume in a mathematical problem (5.MD.C.5)
9	**(4, 0)**	4 across, 0 up	Interpret the x-coordinate as horizontal distance (5.G.A.1)
10	**(0, 0)**	Where the two axes cross	Identify the origin (5.G.A.1)
