Math Practice Test H

1 5 friends share 3 pizzas equally. What fraction of a pizza does each friend get?

Working

Answer

2 Without working it out: is 3/4 × 250 greater than, less than, or equal to 250?

Working

Answer

3 Sam ran 2 1/4 miles on Monday and 1 2/3 miles on Tuesday. How much farther did he run on Monday?

Working

Answer

4 Half a pizza is shared equally among 3 friends. What fraction of the whole pizza does each friend get?

Working

Answer

5 A jar has 15 red marbles. That is 25% of all the marbles. How many marbles are in the jar?

Working

Answer

6 A jacket costs $80. Its price is reduced by 25%, and then the new price is reduced by a further 10%. What is the final price?

Working

Answer

7 Pencils cost p cents each. Write an expression for the cost, in cents, of 7 pencils and a 45¢ eraser.

Working

Answer

8 Dad is 4 times as old as Mia. In 6 years he will be 3 times as old as Mia. How old is Mia now?

Working

Answer

9 A triangular flag has a base of 9 cm and a height of 6 cm. What is its area?

Working

Answer

10 Work out (–6) × 2/3 × (–1/4)

Working

Answer

Answer Key: Math Practice Test H

Answers involving money or ages should include units ($, ¢, years). Working shows one way to solve each.

Q	Answer	Working	Skill checked
1	**3/5**	3 ÷ 5 = 3/5	A fraction as division in a sharing problem (5.NF.B.3)
2	**less than**	3/4 is less than 1, so it shrinks 250	Multiplication as scaling (5.NF.B.5)
3	**7/12 mile**	Twelfths: 2 3/12 – 1 8/12, borrow one whole: 1 15/12 – 1 8/12	Fraction subtraction word problem (5.NF.A.2)
4	**1/6**	1/2 ÷ 3 = 1/6	Divide with unit fractions (5.NF.B.7)
5	**60**	25% is 1/4, so the whole is 4 × 15	Find the whole given a part and the percent (6.RP.A.3.c)
6	**$54.00**	25% off: $80 – $20 = $60. Then 10% of $60 is $6: $60 – $6 = $54	Solve multi-step percent problems (7.RP.A.3)
7	**7p + 45**	7 pencils cost 7 × p = 7p cents; add 45 for the eraser	Write an expression with a variable for a real-world problem (6.EE.B.6)
8	**12 years**	Mia = m, Dad = 4m. Then 4m + 6 = 3(m + 6), so 4m + 6 = 3m + 18 and m = 12	Write and solve an equation from a word problem (7.EE.B.4)
9	**27 cm²**	Half of base × height: (9 × 6) ÷ 2 = 27, in square centimeters	Area of a triangle in a real-world problem (6.G.A.1)
10	**1**	Two negatives give a positive. 6 × 2/3 = 4, then 4 × 1/4 = 1	Multiply rational numbers using properties of operations (7.NS.A.2.c)
